- Has a Unique Metered Foaming Pump – and is non aerosol
- Is Economical. Lasts twice as long as alcohol based gels

Did you know that over 80% of all infectious diseases are passed by human contact either directly or indirectly? In the world today we are surrounded by a multitude of bacteria, germs and viruses that can lead to mild or serious illness. With the spread of new bacterial and flu strains, hand sanitisers have become the convention for on the go hand washing. Doctors and Medical Professionals strongly recommend keeping clean hands by proper washing or using hand sanitisers. Most hand sanitisers on the market are alcohol based. These products are known to cause skin dryness, irritation and contact dermatitis. Alcohol based sanitisers are also highly flammable. DERMASOFT Foaming Sanitiser offers an alternative which is gentle, safe, non-drying, non-irritating, non-flammable and biodegradable.

DERMASOFT hand sanitiser utilises the organic compound Benzalkonium Chloride as the active ingredient. Benzalkonium Chloride has been recognised and used for over 30 years as an effective antibacterial and antiseptic agent and has been proven to be 99.99% effective.

DERMASOFT Foaming Hand Sanitiser is Laboratory Tested and Approved to the internationally recognised EN 12054 standard for Hand Sanitisers. It Kills 99.99% of germs associated with the most common infection carrying bacteria. Escherichia coli ATCC 11229, Enterococcus hirae ATCC 10541, Staphylococcus aureus ATCC 6538, Pseudomonas aeruginosa ATCC 15442.

WHEN TO USE DERMASOFT HAND SANITISER

- At home. Before and after eating and before food preparation
- After using washroom facilities especially public restrooms
- Medical Facilities, - Hospitals, Doctors and Dentists Surgeries, Nursing Centres and Rest Homes
- In the workplace - After using shared office equipment – e.g. phones, computers
- Shared facilities in public areas – Supermarkets, Shopping Malls, Restaurants, Schools, Child Care Centres, Hotels and Motels
- After direct human contact
- Before entering anti-contamination areas

DERMASOFT

Alcohol Free Foaming Hand Sanitiser

The Sanitiser That Loves Your Hands

Highly Effective and Unique

A topical anti bacterial skin sanitiser that works instantly. It is formulated with the active ingredient Benzalkonium Chloride and has been laboratory tested and proven to kill 99.99% of germs which transmit disease.

Safe, Non Flammable, Non Toxic, and Biodegradable.

DERMASOFT Foaming Hand Sanitiser does not contain any Alcohol. Other products that are alcohol based are highly flammable, toxic and often considered unsafe. (US military departments such as the US Navy and some schools have banned their use).

DERMASOFT Hand Sanitiser will Not Dry out Your Skin

The DERMASOFT formulation is unique as it applies as a foam and it is formulated for repeated use. Unlike alcohol based products, DERMASOFT helps to retain your skin's naturally protective barrier rather than drying it out and causing irritation.

Fast, Comfortable and Convenient

DERMASOFT Foaming Instant Sanitiser can be used as frequently as needed. No soap, water, or towels are, needed. The no-drip foam will does not leave the skin feeling sticky and will not stain fabrics.

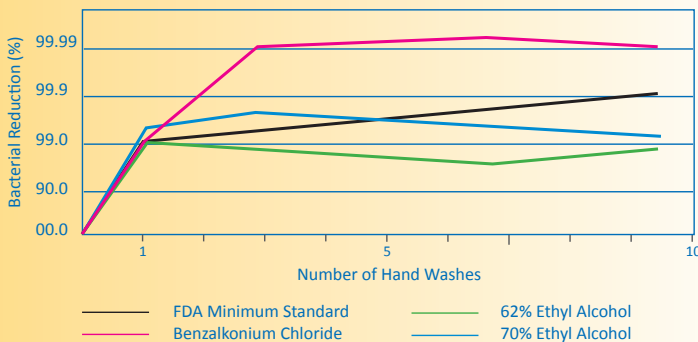

Efficacy actually Increases with Use

DERMASOFT Foaming Instant Sanitiser is long lasting. In laboratory testing the active ingredient Benzalkonium Chloride has been proven to exceed European (EN) and FDA standards for "Leave in Place" sanitisers with an efficacy rate that actually increases with use.
